

CONTINUING PROFESSIONAL DEVELOPMENT SEMINARS

Ancon Building Products has been conducting Continuing Professional Development Seminars to the Construction Industry for over 20 years.

Our seminars are designed to increase the knowledge of construction professionals on a range of structural components used in masonry and concrete.

Content is continually reviewed to ensure the Industry's latest construction methods, design codes and manufacturing capabilities are featured.

Our seminars can be tailored to meet your requirements or selected from the two standard formats shown.

These seminars can be arranged at a time of your choosing and are usually kept to within one hour; requirements for longer, more in-depth presentations can be accommodated. Seminars are normally conducted at your premises over a lunchtime and can be accompanied by a complimentary buffet to make full use of the time available.

To book a CPD seminar or to discuss your requirements please contact the

SUPPORT & RESTRAINT OF MASONRY CLADDING on Framed Buildings

- Specifying appropriate wall ties and restraint fixings to EC6, BS5628, BS8298 and Approved Document E
- Using 'non-drill' restraint fixings
- Positioning of, and detailing at, movement joints
- Supporting masonry above horizontal movement joints
- Designing, selecting and specifying windposts and masonry reinforcement

DESIGNING FOR JOINTS in Structural Concrete

- Replacing lapped joints & projecting starter bars using reinforcement continuity systems, starter systems and couplers
- Selection, performance and testing of rebar couplers
- Incorporating thermal breaks at balcony locations
- Transferring shear across movement joints using simple debonded dowels and proprietary shear connectors
- Replacing double columns, corbels and half lap joints
- Accommodating thermal movement in two directions
- Reinforcing against punching shear to BS8110 and EC2 using links and stud rail systems

HOLD YOUR CPD SEMINAR AT ANCON'S HEAD OFFICE

Your CPD seminar can be held at Ancon's head office in Sheffield, South Yorkshire. Here, the seminar can be accompanied by a tour of the company's design, project management and manufacturing operations. Our conferencing and training facilities also feature a permanent product display area.
