

Ancon®

A1-25/14 Clip

Non-combustible Insulation Retaining Clip

The Ancon A1-25/14 is a stainless steel insulation retaining clip specifically designed to fit the Ancon 25/14 Channel Restraint System. Made from high tensile strength spring steel, the Ancon A1-25/14 clip is fully formed and ready for use straight out of the box, simplifying and speeding up installation on site.

Product Features

- Made from stainless spring steel - rated 'A1' for reaction to fire
- Excellent corrosion resistance
- 60 year design life
- Designed to fit the Ancon 25/14 Channel for robust and reliable insulation retention
- Delivered to site pre-formed and ready for installation
- Quick and simple installation. Simply clips to the back of the 25/14 channel
- Rounded edges for safety
- Suitable for use with all insulation types
- Can be located either at fixings positions using the preformed vertical slot or remote from fixing locations as the clip grips the sides of the 25/14 channel

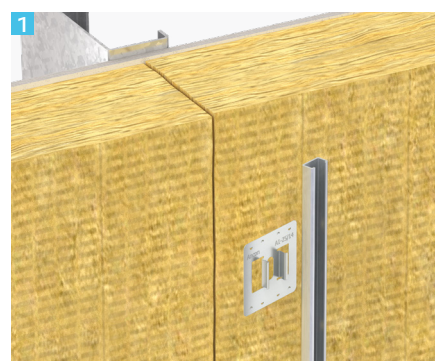

Technical Data

Material	Grade 1.4310 austenitic spring steel
Thickness	0.5mm
Clip dimensions	80 x 65mm
Reaction to fire (EN 13501-1)	A1
Design life	60 years (under normal service conditions)
Pack size / weight	250No. (5kg)
Suitable for use with	Ancon 25/14 Channel Restraint System

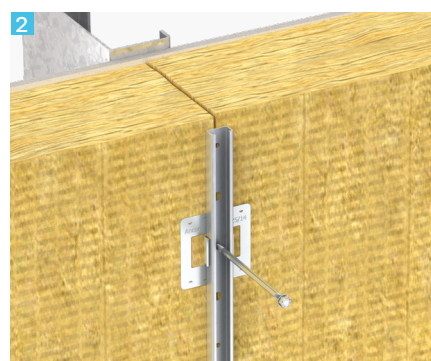

Installation

Installation of the Ancon A1-25/14 clip is quick and simple:

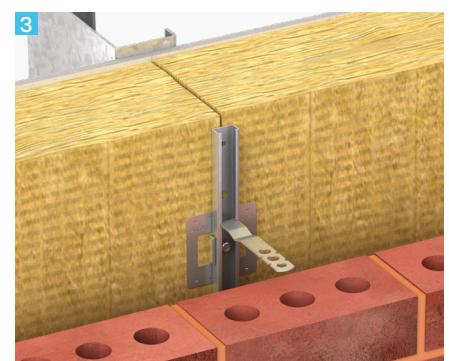

Note: Installation example using the SD25 channel ties.

1 Fit the insulation retaining clips to the back of the 25/14 channel at the recommended spacing and position the insulation in the desired location.

2 Install the appropriate fixing through the 25/14 channel and insulation and into the backing structure at the recommended spacing.

3 Install the SD25 ties at the recommended spacing.
