

Ceramic Fibre Fixing Systems

Twistlock System

This system is used to retain ceramic fibre linings. The standard set comprises a twistlock stud, ceramic arc shield, carbon steel speedfix washer, and stainless steel twistlock washer.

Threaded Fixing System

Threaded sets are for new build applications or refurbishment work. The standard set comprises an M5 threaded stud, ceramic arc shield, carbon steel speedfix washer, stainless steel clearance washer and M5 hex nut to hold the washer in place.
